

HEMA SHARMA

BUSINESS ANALYST | POWER BI & DATA ANALYTICS

New Delhi, India | +91-9220527923 | hemma.sharma154@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Business Analyst with experience across HR operations and recruitment analytics, specializing in requirement elicitation, stakeholder management, and translating business needs into data-driven solutions. Skilled in building Power BI dashboards, automating workflows with Power Automate, and using SQL and Python for exploratory analysis. Track record of standardizing processes, reducing operational overhead, and supporting executive decision-making with clear, actionable reporting. Currently building an independent business analytics practice alongside professional experience.

CORE COMPETENCIES

Business Analysis: Requirement Elicitation, BRD/FRD Documentation, Gap Analysis, Process Mapping (BPMN), Use Case & User Story Development, UAT Support, Stakeholder Management.

Technical: Power BI, DAX, Power Query, SQL Server (SSMS), DAX Studio, Power Automate, Microsoft Fabric, Python (Pandas, NumPy, BeautifulSoup), Advanced Excel (VLOOKUP, Pivot Tables), Looker Studio, GitHub

Soft Skills: Negotiation, Conflict Resolution, Cross-functional Leadership, Executive Communication

PROFESSIONAL EXPERIENCE

Freelance Business Analyst / Power BI Consultant | *Independent Practice* Jun 2025 – Present

- Deliver Power BI dashboarding, Power Automate process automation, and SQL-based ad hoc analysis for small business clients as core service offerings.
- Designed a star-schema sales & marketing data model with DAX measures (revenue, profit margin %, YoY growth, cumulative revenue) to demonstrate end-to-end BI delivery capability.
- Built a scheduled-refresh failure alert automation in Power Automate, integrating Outlook and Teams notifications to reduce dashboard downtime.

Business Analyst – HR Operations | *Shree Ojas System & Techinfra Pvt. Ltd* Oct 2024 – May 2025

- Standardized fragmented workflows across offices through gap analysis and stakeholder sessions, reducing annual operational overhead.
- Built a Power BI dashboard with automated back-end data flows to track productivity, cutting operational costs by 30%.
- Facilitated cross-functional alignment supporting 20+ remote hires, achieving 100% on-time project delivery.
- Automated manual compliance reporting, improving task efficiency by 30% and reclaiming 10% of staff bandwidth.
- Performed competency mapping to identify skill gaps and built a data-driven internal mobility framework, increasing mobility by 20%.

MBA in Data Science & Business Analytics, Manipal University — 2023–2025 (full-time)

Founder & Business Analyst – Recruitment Analytics | *Corporate Recruitment Solutions* Oct 2019 – Dec 2022

- Set up recruitment analytics processes from the ground up, improving client retention by 50% and cutting time-to-hire by 20%.
- Built dashboards to monitor client hiring pipelines and project governance for a 10-member team.
- Streamlined client onboarding with structured data collection templates, improving onboarding success by 10%.
- Used Python and Power BI to analyze attrition risk and present retention strategies to executive leadership.
- Delivered a predictive workforce-efficiency roadmap that informed turnover-reduction strategy.
